Experience

Computational Genomics Laboratory - University of California Santa Cruz

Remotely from Vienna, Austria

SOFTWARE DEVELOPER

since Mar. 2017

- Developing "Sequence Tube Maps", a JavaScript module to visualize genomic sequence graph data structures, which cannot be displayed by existing genome browsers.
- Building a web application to interactively query and visualize genomic variation graphs.

Facebook

London, UK

SOFTWARE ENGINEERING INTERN

Jan. 2018 - Mar. 2018

- Built a customer support chatbot to interact with users who have posted content which violates the site's community standards.
- Allows users to appeal content takedown decisions, informs about rules for posting content, and collects user feedback.

Catalysts GmbH

Vienna, Austria

SOFTWARE DEVELOPER

Aug. 2017 - Dez. 2017

- Java Development: member of the development team building a cloud-based car-dealership-management-system for the Volkswagen group.
- Data Science Team: parsed and analyzed weather, traffic, and location data (with Python and Pandas).

Computational Genomics Laboratory - University of California Santa Cruz

Santa Cruz, USA

VISITING RESEARCHER/DEVELOPER

Nov. 2016 - Jan. 2017

- Continued development of "Sequence Tube Maps" in cooperation with the graph genomes group.

EMBL - European Bioinformatics Institute (Cambridge)

Remotely from Vienna, Austria

GOOGLE SUMMER OF CODE INTERN

May 2016 - Aug. 2016

- Started development of "Sequence Tube Maps".
- Developed an algorithm which generates clearly laid out representations of complex datasets and which scales well to bigger inputs.

Roche Diagnostics

Vienna, Austria

PRODUCT MANAGER, LABORATORY MANAGER, SYSTEMS SPECIALIST

Aug. 2012 - Apr. 2016

- Achieved a tender winrate of more than 70% (compared to a market share of 50%) by coordinating efforts to offer competitive tailor-made solutions.
- Designed solution for Austria's biggest private diagnostic laboratory allowing analysis of up to 200% more samples while keeping turnaround times constant.
- Accompanied implementation of new laboratory for Austria's biggest hospital, reducing turnaround time by 40%.
- Created various tools for the automatic analysis of laboratory equipment log files which allow pinpointing bottlenecks to improve workflow processes.

Self-Employed

PROFESSIONAL ONLINE POKER PLAYER

2010 - 2012

- Applied mathematical (probability theory, statistics, game theory) and psychological skills.

Education

Software and Information Engineering, BS course, did not graduate, GPA 4.0

Vienna, Austria

TECHNICAL UNIVERSITY OF VIENNA

Mar. 2016 - Jun. 2017

- Focus on general coding and algorithmic skills

Molecular Biology, MS, GPA 4.0

Vienna, Austria

UNIVERSITY OF VIENNA

Oct. 2003 - Nov. 2010

- Thesis: "RNA Secondary Structure Prediction including Pseudoknots". Collaborated on the development of a novel algorithm with fewer restrictions than previous ones. Code is part of the "ViennaRNA Package" which is being used worldwide for computational RNA biology research. Written in C.
- Majors: Bioinformatics, Structural Biology, Genetics

Exchange Semester and Research Internship

UNIVERSIDADE NOVA DE LISBOA AND INESC-ID

Lisbon, Portugal

Jan. 2007 - Jul. 2007

- Evaluated models to estimate parameters for metabolic networks based on time series data of metabolite concentrations (poster accepted at the German Conference of Bioinformatics 2007).

Business Management and Administration, MA, GPA 3.5

VIENNA UNIVERSITY OF ECONOMICS AND BUSINESS ADMINISTRATION

Vienna, Austria

Oct. 1999 - Jun. 2004

- Thesis: "The Quadrature Method in Comparison with Other Methods for Valuing Barrier Options". Implemented various pricing models for exotic options and evaluated their performance.
- Majors: Business Management and Controlling, Finance

Exchange Semester

UNIVERSITY OF TECHNOLOGY SYDNEY

Sydney, Australia

Jan. 2002 - Jul. 2002

Projects

Sequence Tube Maps

www.github.com/vgteam/sequenceTubeMap

- A JavaScript module for the visualization of genomic sequence graphs which automatically creates a "tube map"-like visualization of a given sequence graph.
- In addition to nodes and edges, sequence graphs contain the notion of paths and can therefore not be properly displayed by standard graph visualization tools. Developed a custom algorithm which lays out the graph's components and generates a visualization which displays the relevant information in an intuitive way.
- Technologies: JavaScript, React.js, Node.js, D3.js

Tutorial for Image Recognition with Tensorflow

www.wolfib.com/Image-Recognition-Intro-Part-1

- Teaches the principles of image recognition via practical examples in TensorFlow to people with coding experience, but without prior machine learning knowledge.
- Received more than 120,000 page views and has been published by freeCodeCamp, one of the biggest publications on medium.com.
- Technologies: Python, TensorFlow

AI Agent for Deuce to Seven Heads Up Poker

www.playmybot.com

- Developed an application which uses Counterfactual Regret Minimization to determine a strategy for playing Deuce to Seven Heads Up Poker. This is to my knowledge the only (public) AI for this poker variant.
- The strength of the AI strategy is comparable to human level players according to my preliminary testing.
- Built a web application in Node.js to allow anyone to play against the AI and to gather feedback about its competitiveness.
- Technologies: Java, JavaScript, Node.js

Language Skills

Programming Languages JavaScript, Java, Python, HTML, CSS

Natural Languages German (native speaker), English (fluent)

Hobbies, Interests and Achievements

Scout Leader Organized domestic and international camps for dozens of participants
Supported a local NGO in accomodating asylum seeking families

Mountain and Water Sports Hiking, Vie Ferrate, Rock Climbing, Surfing, Kite Surfing

Competitive Coding Facebook Hacker Cup 2018: Top 5% (358 out of 8216)

Google Hash Code 2017: Top 6% (143 out of 2815)

Catalysts Coding Contest 2017: Top 3% (31 out of 1499)

Mathematics Participated in the International Mathematical Olympiad 1998 in Taiwan
(5th place in the Austrian nationals)
